

**NOT THE EASY WAY**

Speak. Aspire. Take Action.

## **SPEAK SPACE KIDS**

*Not The Easy Way* is an educational psychology service led by educational & child psychologists, Dr Claire McGuiggan & Dr Peter D'Lima.

*Speak Space Kids* is a programme designed by us to help develop young people's skills in exploring different views about sensitive but important topics that affect young people today. This is facilitated by introducing a moral dilemma and moving through the process in the infographic.

Through this and the specific skills modelled and encouraged, young people are supported to become active, global citizens who can tolerate and engage effectively with a broad range of ideas & deepen their understanding of their own values.

*The Speak Space Kids* training package for schools consists of:

- A Full Day INSET Training involving the psychological underpinnings of the approach, modelling and practice of the *Speak Space Kids* approach.
- Two follow up supervision sessions (1.5 hours each) to support your staff in implementing and evaluating the approach in your setting.
- A *Speak Space Kids* handbook for each member of staff attending the training.
- Being linked with a network of schools who are implementing the approach.
